Laurent Hardy

Madrid, España
Capacitador

País de residencia: España

Nacionalidad: España

Idiomas: Español, Francés, Inglés

Áreas de conocimiento

Blockchain, Energías, Estrategia de mercado, Sistemas complejos, Tecnologías emergentes, Toma de decisión, Recursos naturales, Agua, Start-Ups.

Descripción del perfil

I like to think that I'm a challenger by nature: eager to get to the bottom of things, understand how they work, find loopholes in reasonings, try the new instead of sleeping on the old. My studies in bioengineering and electrical engineering made me understand a broad range of problems, opportunities, technologies and business logics. But I never quite followed the expected path in my professional career. I was always more attracted by the unknown than by the problems I was expected to solve. Starting with 3 years of research on the nexus between water and energy at Polytechnic University of Madrid and Complutense University, I later fulfilled a passion for energy technologies at the Repsol Technology Centre for 5 years. I challenged them with new business models such as energy services or mobility as a service, and new technologies such as decentralised energy generation, consumption and monitoring. In late 2015 I discovered blockchain technologies and could never stop reading about it. For me it has been a Pandora's box that will last a long time before I can get to the bottom of it. Wiser and brighter people came into my life and made me see the world differently. I could get involved with ongoing projects and started new ones that will soon be part of my new reality.

Experiencias

Cofounder

Cryptoeconomics.hub

2017 - Actual

Cofounder

Ethereum Madrid

2016 - 2018

Senior Technologist

Repsol

2015 - 2018

Technologist

Repsol

2012 - 2015

Research Assistant

Complutense University of Madrid

2011 - 2012

Research Intern

CEIGRAM

2009 - 2010

Estudios

Master of Science (MSc), Renewable Energy Systems Technology

Loughborough University

2012

Bachelor of Engineering (B.Eng.), Rural and Environmental Engineering

Universidad Politécnica de Madrid

2009

Bachelor of Engineering (B.Eng.), Rural and Environmental Engineering

Faculté universitaire des Sciences agronomiques de Gembloux

2007
