HISTORIC DIFFICULTY IN SCIENTIFIC PIPELINE ENTRY FOR HISPANICS AND SPANISH SPEAKING STUDENTS

There have been many Latin American scientist who have contributed to the global science and technological humanity advancements; Chemistry, Medicine and Physiology Nobel Prizes, important researches, vaccines, discoveries, aerospatial engineering contributions and many others. These contributions lead to the reflection that there is not an intellectual gap between Latin America (the third world) and the first world. Nonetheless, Latin

America itself doesn't recognize the scientists and their contributions enough to made them part of their most valuables assets...
