Descripción del perfil

Dynamic and accomplished Product Management professional with 13+ years of experience and success in driving growth, slashing costs, optimizing operations, and developing solutions for Fortune 500 companies. An enthusiastic public speaker with experience of speaking on TEDx, keynote speeches for Conferences and many years of debating experience behind him. A budding professor who loves to teach and impart knowledge to his students and guide them on their future careers tracks. I like to don multiple hats, forming a bridge between Tech and Business and excelling in consulting leadership, product automation and scalability, organizational data analysis, and project management. An Analytical professional skilled in successfully navigating organizations through periods of accelerated growth and expansion. A Collaborative communicator continually focused on building relationships and promoting synergy across business lines and global units to drive positive change, comprehensive business approaches, and enhanced profitability. Tech-savvy, proactive, resourceful, and respected. https://www.linkedin.com/in/prashantkumariemba2014/

Conferencias, Cursos o Talleres

IE Tech Lab - Product Management Toolkit

4 Horas o más

Product Management Toolkit is a project-based course that focuses on action learning and a build your own case approach to teach foundational product management skills. The course focuses on understanding your customer's problems, develop customer research hypothesis, simple MVP tests, a market requirement, product requirements, and product vision deck. All of these are very distinct from typical business & company formation

deliverable's as they are all geared to the use cases of problems of your customers & your actual product.
